Project Report On *Employee Management System*

Supervised By
Md. Hasibul Hasan

Submitted By:

Name			ID		
1. Shakil Mahmud			20-44216-3		
2. Md Ashfaq Ahmmed Lejon			21-44942-2		
3. Abdullah Adnan Abul Kalam			22-47846-2		
CO2: Display and verify the mean of a real-life Project using the concepts of C# Graphical User Interface based environment with database integration to depict a desktop-based application.					
Assessment Criteria	Not Attended/ Incorrect (0)	Inadequate (1-2)	Average (3)	Good (4)	Excellent (5)
Evaluation Criteria	Evaluation Definition				Total =
Requirement fulfillment	Properly demonstrate a real-life scenario-based project with proper functional requirement identification for the Object-Oriented Programming project development activities.				
Validation	Ensuring the ability of students’ proper demonstration on validation forms in their system in terms of dealing with the data.				
Verification	Identifying if the students can verify the system data along with proper functional requirements in terms of data flow.

Chapter:01

Introduction:

This Employee management system, which was created using the C# programming language, supports an owner and numerous manager in two separate roles. The Owner has complete control over user information, including the ability to add and remove managers. They have the ability to oversee the main features of the system. Regular managers enjoy secure login features, enabling them to search for fellow employees, view salary information, and modify their passwords. This system prioritizes robust security measures while maintaining an intuitive interface for seamless data management. Its design ensures a user-friendly experience, empowering both owner and manager to efficiently handle employee information within the organization.

Chapter:02

User Stories:

There are Basically Two types of users in our system. One is Owner and the other one is Manager. The Features are describing below;

Owner:

- 1. Login Functionality:** Owner can securely log in using a unique user ID and password. The system validates credentials and allows access upon correct input. Incorrect entries prompt error messages for wrong user ID or password.
- 2. Employee Search:** The owner possesses the ability to swiftly locate specific employees within the system by utilizing their unique identification numbers (IDs). This feature provides a convenient and efficient means of accessing precise employee information. By inputting the employee's unique ID, the owner can instantly retrieve detailed information. This streamlined search capability enhances organizational efficiency, enabling prompt access to individual employee profiles for necessary updates, reviews, or reference purposes.
- 3. Manage Employees:** Access to comprehensive employee details (Employee ID, name, salary, DOB, joining date, designation) is provided. Owner can edit and update employee information. Additionally, functionalities to add and delete users from the database are available within this module.
- 4. Leave Management:** The owner can access and manage employee leave records, including the number of days an employee has been on leave. Additionally, the owner has the authority to increase the leave day count for employees. If the total leave count surpasses 20 days, an automated penalty system is activated. For each day exceeding the 20-day threshold, the system deducts 500 takas from the employee's main salary as a fine. This automated process ensures meticulous leave tracking while enforcing adherence to leave policies, with the system seamlessly updating the database to reflect these adjustments.

5. Salary Management: Within this module, the owner can promote employees' positions in addition to updating their salary. Salary increases are made easy with this empowerment, as the database is instantly updated to reflect the changes. Additionally, the owner can update personnel designations, guaranteeing precise and timely changes that are in line with the organizational structure.

6. Change Password: This section enables the Owner to change their password securely. By entering the old password and typing a new one twice, the system ensures a smooth and secure password update process.

7.Add User: The Owner can add multiple users to the system by adding their User Id, User name, Role and Password.

8. Logout Functionality: Owner can securely log out from the system, ensuring data security and confidentiality.

These features empower the Owner with comprehensive control over employee data, allowing for seamless management of employee details, leave records, salary adjustments, and secure password management.

Manager:

- 1. Login Functionality:** Managers can securely log in using their unique user ID and password. The system authenticates credentials, providing access upon correct entry. Incorrect inputs prompt error messages for wrong user ID or password.
- 2. View Employee Info:** Manager can search and access limited details of fellow employees, including names, employee IDs, contact numbers, and designations. This feature allows for information retrieval without the ability to make changes.
- 3. Change Password:** Managers can update their passwords securely. By entering the old password and typing a new one twice, the system ensures a smooth and secure password update process.
- 4. Logout Functionality:** Managers can securely log out of the system using a dedicated button, ensuring data security and confidentiality.

Managers are equipped with essential functions through these features, like reading personal information, controlling their own passwords, accessing restricted employee data, and safely exiting the system.

Technology Stack:

Language: C#

Framework: .NET Framework

Database: SQL Server

User Interface: Windows Forms

Normalization:

Employee:

2NF:

E.ID(Primary key), E.Name, E.Designation, E.Salary, E.DOB, E.Joining_date, E.Leave_Count, E.Contact_Number

User:

2NF:

User_Id (Primary key), User_Name, User_Password, User_Role

SQL SERVER Queries:

Table Creation Query For Employee Data Table:

```
CREATE TABLE [dbo].[EmployeeData](
    [Emp. ID] [nvarchar](10) NOT NULL,
    [Emp. Name] [nvarchar](70) NOT NULL,
    [Designation] [nvarchar](50) NOT NULL,
    [Salary] [int] NOT NULL,
    [DOB] [date] NOT NULL,
    [Contact Number] [nvarchar](11) NULL,
    [Joining Date] [date] NOT NULL,
    [Total Leave Count] [int] NULL
) ON [PRIMARY]
```

Table Creation Query For User Info Table:

```
CREATE TABLE [dbo].[UserInfo](
    [Id] [nvarchar](10) NOT NULL,
    [UserName] [nvarchar](80) NOT NULL,
    [Password] [nvarchar](80) NOT NULL,
    [Role] [nvarchar](20) NOT NULL,
    CONSTRAINT [pk_id] PRIMARY KEY CLUSTERED
(
    [Id] ASC
)WITH (PAD_INDEX = OFF, STATISTICS_NORECOMPUTE = OFF,
IGNORE_DUP_KEY = OFF, ALLOW_ROW_LOCKS = ON, ALLOW_PAGE_LOCKS =
ON) ON [PRIMARY]
) ON [PRIMARY]
```

2.

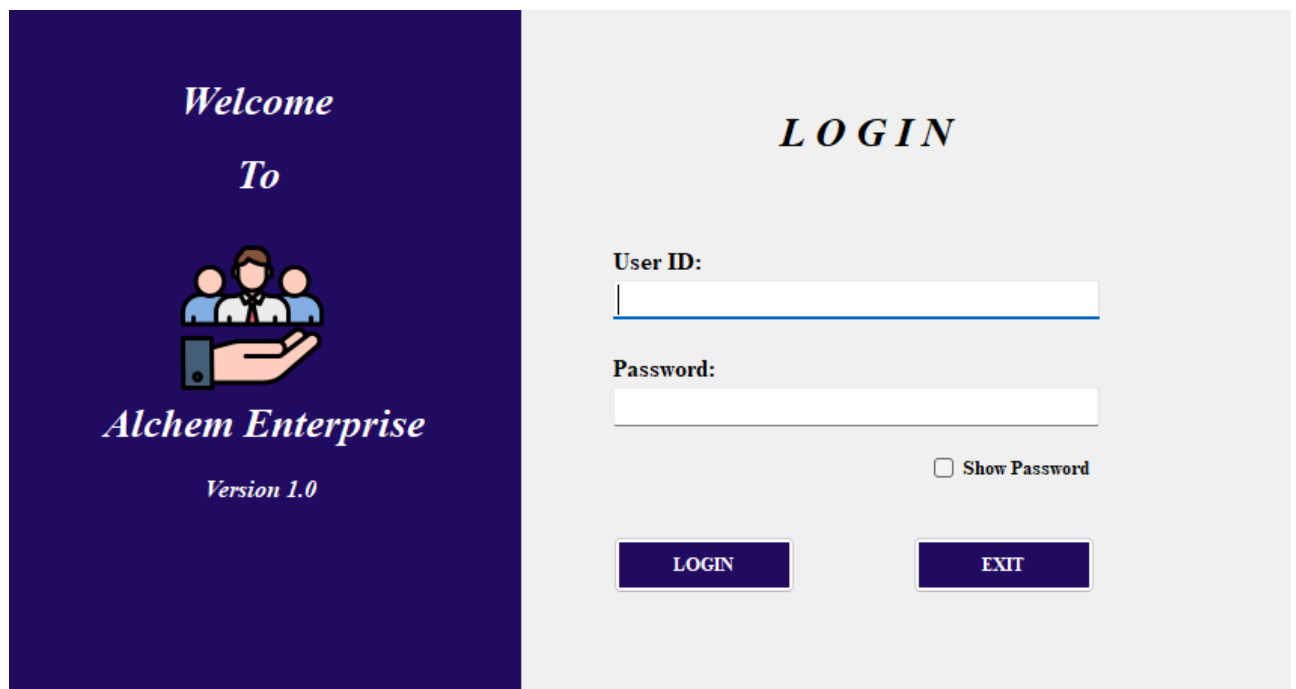

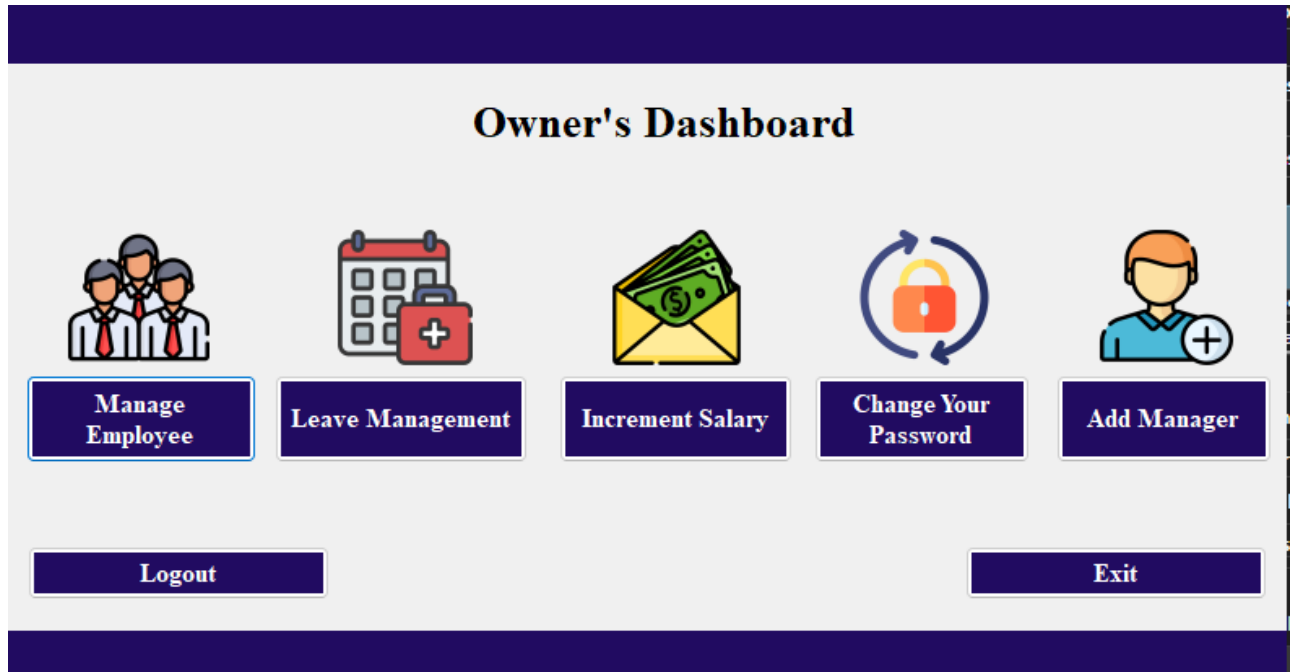

A screenshot of a login form for "Alchem Enterprise". The interface is split into two panels. The left panel has a dark blue background and contains the text "Welcome To" in white, an icon of a hand holding a tablet with three people on it, the text "Alchem Enterprise" in a white serif font, and "Version 1.0" below it. The right panel has a light gray background and is titled "LOGIN" in a bold, italicized serif font. It contains two input fields: "User ID:" and "Password:". Below the password field is a checkbox labeled "Show Password". At the bottom, there are two buttons: "LOGIN" and "EXIT", both in white text on a dark blue background.

Fig: Login Form

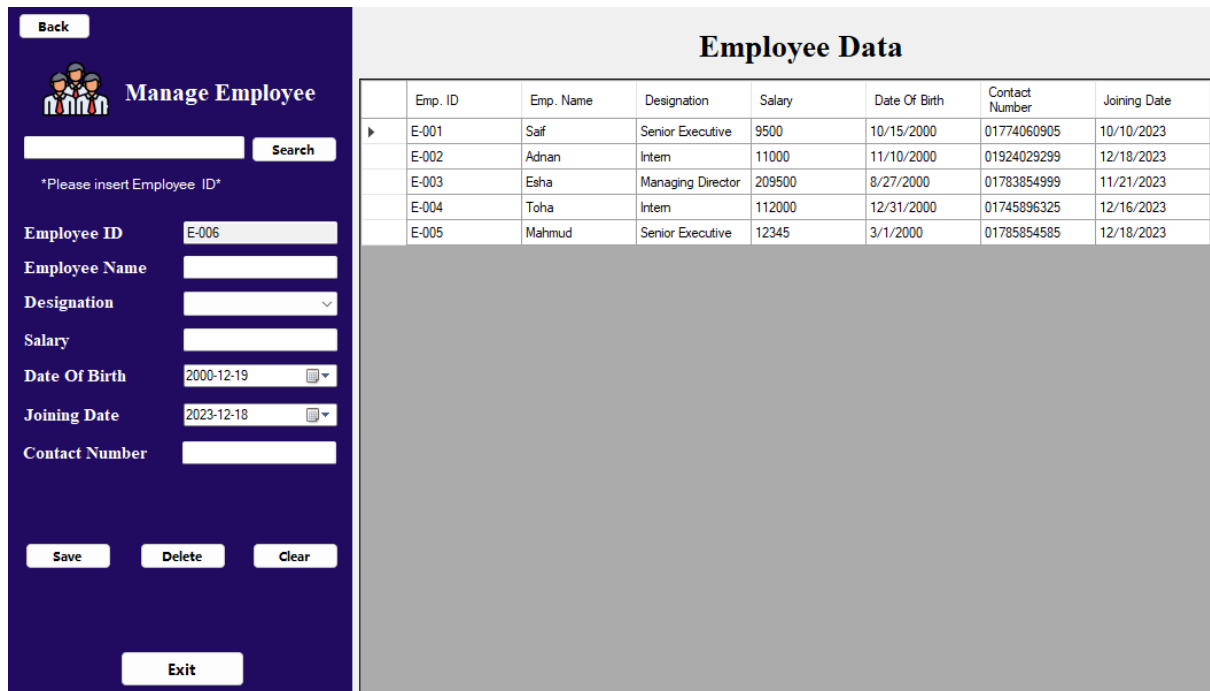

3.

The Owner's Dashboard is a web interface with a dark blue header and footer. The main content area is light gray and features five large, rounded rectangular buttons arranged horizontally. Each button has a corresponding icon above it: a group of three people for 'Manage Employee', a calendar with a red plus sign for 'Leave Management', a yellow envelope with money for 'Increment Salary', a circular arrow with a red padlock for 'Change Your Password', and a person with a plus sign for 'Add Manager'. At the bottom of the dashboard, there are two more buttons: 'Logout' on the left and 'Exit' on the right.

4.

The Manage Employees Form is a web interface with a dark blue header and footer. The main content area is light gray and features a table titled 'Employee Data'. The table has eight columns: Emp. ID, Emp. Name, Designation, Salary, Date Of Birth, Contact Number, and Joining Date. The table contains five rows of data. To the left of the table is a form for managing employees, which includes a 'Back' button, a 'Manage Employee' title, a search bar, and a list of employee details with input fields for each field. At the bottom of the form are buttons for 'Save', 'Delete', 'Clear', and 'Exit'.

Emp. ID	Emp. Name	Designation	Salary	Date Of Birth	Contact Number	Joining Date
E-001	Saf	Senior Executive	9500	10/15/2000	01774060905	10/10/2023
